Allowable subject matter

Claims 1, 2, 4, 7, 9-12, 14, 18-20, 22, 26-29, 32 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art neither discloses nor suggests the following limitations as disclosed in the independent claims 1, 11, 19, 27:

The prior art fails to teach a method or system to maintain a synchronous copy of a data change log and asynchronously update a secondary data volume of a secondary node using said synchronous copy of the data change log, wherein the updating comprises identifying an entry of said plurality of entries or a failover management module configured to identify an entry of said plurality of entries as corresponding to an incomplete write operation on the primary data volume and updating the secondary data volume using the entry as required by claims 1, 11, 19 and 27.

The closest reference, Iwamura et al. (7,130,974) teaches maintaining a synchronous copy of a data change log (Col. 24, lines 40-51) and asynchronously (Col. 25, lines 54-58) updating a secondary data volume of the secondary node (Col. 2, lines 41) but fails to explicitly disclose the updating comprises identifying an entry of said plurality of entries or a failover management module configured to identify an entry of said plurality of entries as corresponding to an incomplete write operation on the primary data volume and updating the secondary data volume using the entry.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
